

News from the Parish Council...

We are delighted to announce that we have been successful in receiving funding from the Sheringham Shoal Community Fund via Norfolk Community Foundation for the new LED streetlight project.

Following a public survey carried out last September, we received overwhelming support for the project to switch our current sodium streetlights to LED streetlights, which will not only save costs in electricity and maintenance, but more importantly will reduce the energy output, help with climate control and help our environment.

We would like to thank the Sheringham Shoal Community Fund for awarding us the funds needed to proceed with this project.

The work is now in hand and will be completed within the next few months.

Sheringham Shoal Community Fund Grants are available to other organisations that fit the criteria...further information can be found via their website www.sheringhamshoal.co.uk
